

## **Potterton Promax HE boilers win hands down on reliability**

Potterton secured a contract with North Tyneside Council in 2006 for the supply of Potterton Promax Combi HE Plus gas fired boilers.

North Tyneside Council have installed over 900 Potterton Promax high efficiency boilers, which as Chris Jones, head of plumbing and electrical for North Tyneside Council, stated has only needed an engineer to call on one of them, which is exceptional reliability.

The council, which manages approximately 16,500 properties across the region and install between 30 and 35 SEDBUK Band A rated Potterton Promax Combi HE Plus boilers per week as part of North Tyneside Council's commitment to the Decent Homes Act.

The Potterton Promax Combi HE Plus boilers - the Combi 28 and Combi 33 - have flow rates of 11.5 and 13.5 l/min @ a 35°C rise and offer outputs of 28kW and 33kW perfect for the task offering the right levels of comfort and hot water on demand.

Chris Jones, said: "With the Potterton Promax Combi HE Plus we have found a boiler range we can trust. Reliability is a key factor for two reasons; firstly we want our tenants to benefit from constant, affordable warmth, and secondly we want to reduce costly and time consuming maintenance call-outs."
